

[Fixing JSON Parse Error In WordPress Plugins](#)

demo.json-content-importer.com 0 + New How are you, bern?

JSON Content Importer: Settings

Template engines Shortcode-Attributes Shortcode-Values Settings HTTP-Header **Check Installation** Uninstall

Check if installation is ok:
PHP-Version: Installed: 5.6.17-nmm1
Twig-Parser [needs at least PHP 5.2.7: PHP ok for using twig-parser](#)
JCI-parser needs at least PHP 5.3.0 for using [Anonymous PHP-functions: PHP ok for using JCI-parser](#)

Check twig:
Is twig working? **YES**

Check JSON-cacher and cachefolder (directory where JSON-feeds are stored to reduce API-requests):
cache is NOT active (see 'Settings')
cacheFolder /www/htdocs/w0135691/demo.json-content-importer.com/wp-content/cache/jsoncontentimporterpro/ is NOT there
don't panic: this is ok if cache was never active on this wordpress installation.
the directory is created the first time the cache is switched on and used!

Check other plugins:
Some other plugins also use the twig-templateengine. This may cause problems as severals twig-libraries are arround:
In this case, wordpress might not use the twig-libraray which comes whith this plugin. But a newer or older version.
If you have problems here, report to the [pluginauthor](#), please.
Plugins to watch:

1. [Akismet \(plugin ok with JCI-plugin\)](#)
2. [SI CAPTCHA Anti-Spam \(plugin ok with JCI-plugin\)](#)

2 plugins found: 0 may cause problems

Thank you for creating with WordPress. Version 4.4.2
